

### 6.2.1 The institutional Strategic/ perspective plan is effectively deployed.

- A small old building was lying unused since long time for want of repairs. After deliberations, IQAC proposed that it can be restructured and upgraded for more constructive purpose. It was decided that it will be given a face lift and modelled as Multimedia room. The same would be used for interactive sessions, competitions, co-curricular activities and seminars.
- Since the college has five approved Research Centres and scholars are pursuing doctorates, it was proposed that a Research Centre will be constructed on the vacant space near herbal garden.
- In view of the Pandemic and uncertainty about face to face interaction, the faculty would upgrade their e-teaching skills for larger benefit of the students.
- Online conferences and webinars will be organised on pertinent topics by various departments. Where ever a practical demonstrative application will be necessary, a person of research calibre will be invited.
- Keeping in view the multi-disciplinary approach and its growing relevance, faculty development programs will be organised.
- Strengthening of infrastructure will be under taken, viz., purchase of furniture, installation of equipments, necessary material for maintenance of sanitation, strengthening of the IT infrastructure, social distancing standard operating procedures and cleanliness, participating in the stressful period of Covid-19 Pandemic.
- Canteen will be renovated for further improving the hygiene of the food court.
